The article is interesting and well-written. The paragraph related to the use of MSCs in COVID-19 diseases should be improved by analyzing (better) the potential use of AD-MSCs and MSCs in COVID-19, as well as in related diseases such as hair loss and telogen effluvium related to COVID-19. Recently, several articles have been published, and in this narrative review, they should be discussed. For the above-mentioned reasons, the authors should improve the paragraph related to MSCs in COVID-19 and feel free to analyze the following references or others:

doi: 10.14336/AD.2020.0711

doi: 10.1080/14712598.2020.1761322

doi: 10.14336/AD.2020.0422

doi: 10.14336/AD.2021.0121

doi: 10.3390/ijms23169116

A detailed minor revision should be considered.
