

Review of: "Discourse on the Sugar-Sweetened Beverages Tax in Indonesia: The Multistakeholder and Consumers' Perspectives"

Shivashankar Kengadaran

Potential competing interests: No potential competing interests to declare.

The article is well written and provides an insight on the needs and perspectives of SSB tax.

I have a few doubts regarding the methodology which are as follows

1. Weather topic guide was used to direct the questions in achieving the objectives of the study?
2. How was the data saturation and sample size determined ?
3. what was the language in which the FGDs were carried out and how were they transcribed?
4. what was the software used for analyzing the data of FGDs?

with respect to the result section

1. Why were the participants divided based on age?
2. what were the themes derived of the first 2 phases of FGD based on which questions were asked to third group of FGD.
