Potential competing interests: No potential competing interests to declare.

The introduction could be improve with other authors, even with

Methodology: I suggest clarity on how the schools were selected, i.e., was there really a selection (if there was a selection what were the criteria) or were only those that agreed to be part of the study?

Finding: It is necessary to indicate whether the topics were ranked by relevance to the subject by the number of answers given by the interviewees, or by what criteria the ranking was based on.

Lack of support with citations from other articles that reinforce the evidence or indicate that no articles were found on this topic as a relevant finding.

No study limitations is indicated and a paragraph about suggestions of new research about the topic.
