

Review of: "Effective use of Waste Materials: A Case Study of Utilization of Fly Ash in Flexible Pavement Structures"

Adel Djellali

Potential competing interests: .

The paper entitled "Effective Use of Waste Materials: A Case Study of Utilization of Fly Ash in Flexible Pavement Structures," submitted to Qeios Journal, is quite interesting. However, some statements in the manuscript required further justification. Significant comments are summarized as follows:

1. First of all, authors are suggested to proofread this manuscript to avoid grammatical and spelling errors;
2. In the title, the authors have indicated a case study, but no particular case study was found to be reported;
3. In the abstract, authors are invited to rewrite it and provide some results;
4. Authors are invited to indicate the significance and the novelty of this research;
5. Authors are invited to rewrite the manuscript and provide more geotechnical results;

I believe these suggestions could enhance the paper's quality.
