Potential competing interests: No potential competing interests to declare.

327 out of 520 questionnaires distributed to 5 universities in the UAE have about a 63% response rate. The researchers need to provide the sampling design, sampling frame, and the distribution of questionnaires (online or physical). Researchers also need to justify why only five universities in the UAE were selected.

"This study will investigate the effect of social media addiction on sleep problems in college students and the chain mediating effects in the relationship of fear of missing out and nocturnal social media use." What about the chain mediating effects in the relationship of FOMO and nocturnal social media use? I think the chain mediating effects were not discussed at all.
