Potential competing interests: No potential competing interests to declare.

- Useful and impactful topic, both for the environment and for the field of education
- We suggest a series of additions that would improve the presentation of the results:
 1. We suggest the explicit formulation in the text of the hypotheses that were followed and verified in this study;
 2. We suggest the clear formulation in the text of the objectives that were targeted;
 3. We suggest the correlation of the analysis and interpretation of the results with the formulated hypotheses and objectives;
 4. We suggest specifying the manner in which the ethical requirements of research on human subjects were respected
- Given the importance of the researched problem, we suggest the identification and presentation of some suggestions, conclusions for the field of education as well
