Potential competing interests: No potential competing interests to declare.

The article is very well written and the argument it is of great interest for those interested in the area of business gamification theory.

The mechanism of the research it is very well explained also by the literature review and by the exploratory quantitative research.

The proposed frameworks and the enhanced modified Shapley model are a very interesting proposal that could help the servitization ecosystem and help the co-creation process.

Recommendations:

1. Abstract: put DSE correct in the parenthesis to explain Digital servitization ecosystem (DSE).
2. Subchapter 3.1. , 4.2, - the text it is not justified
3. Case study subchapter 5.1- from where those values in yuan come from? it might be advisable to write their source or if it is just an example.

Well done in rest and good luck in your further research.
