Potential competing interests: No potential competing interests to declare.

I think it is a good analysis of what happened on 7 October 2023. Perhaps I would have devoted a little more space to the Abraham Accords and the need for some states (Iran, for example) to disrupt a possible agreement between Israel and Saudi Arabia. I think it is important to highlight these kinds of dynamics.

It is also interesting to analyse the anti-Fatah dynamics between Israel and Hamas in order to maintain the division between Palestinians in Gaza and Palestinians in the West Bank.

The game theory seems to me to be very accurate, as well as the application of Dray's theories.
