Criteria	Yes	No
Does the title represent manuscript's contents?	X	
Is the abstract accurate and concise?	X	
Are the approach/methods properly described?	X	
Are the conclusions and interpretations sound?	X	
Are the references properly cited?	X	
Is this a new/original contribution?	X	

## Comments-

- The article focuses on an important topic of public health importance.
- The title is appropriate.
- The article is well-written and understandable. The methodology and results are clearly mentioned. The figures and tables are self-explanatory and convey the information appropriately. The discussion is appropriate with strengths and

limitations.

- The references are well-cited.

**However, the following are a few suggestions-**

- The manuscript feels quite long. Although the results and conclusions are well-written, the section on background/introduction can be shortened.
- Some of the references are very old and can be replaced.
- There are a few errors in sentence formatting and grammar. It feels strange at places. Needs thorough English language revision and reformatting of sentences throughout the manuscript.

**Can be accepted after modifications**
