

Review of: "The COVID 19 vaccine patent race"

Ragini Jain

Potential competing interests: The author(s) declared that no potential competing interests exist.

Detailed review of patents on vaccines has been presented well. The concluding message is apt in the current scenario where considering the patents to be considered obvious or non-inventive, there should be incentives for inventors to continue with their researches which would benefit the society. The technical details are sufficiently backed in the article and flow of events is well articulated.
