Arrest of Labor in Second Stage

National Cancer Institute

Source

National Cancer Institute. *Arrest of Labor in Second Stage*. NCI Thesaurus. Code C114869.

At least 2 hours of pushing in multiparous women and at least 3 hours of pushing in nulliparous women. Longer durations may be appropriate on an individualized basis (e.g., with the use of epidural analgesia or with fetal malposition) as long as progress is being documented.
