

Review of: "Ancient Houses in Ben Tre City: A Multifaceted Approach to Preserve Artistic Architectural Heritage and Boost Local Tourism"

Aleksandar Valjarevic¹

¹ University of Belgrade

Potential competing interests: No potential competing interests to declare.

The paper is very interesting and very good.

I have a few comments

1. Firstly, the Introduction section can be expanded to include a few new sentences. The Discussion section must contain previously published research on the same or similar topics.
2. The Conclusion section must be expanded. Due to the many good methods, the authors can potentially read and cite the next paper.
3. In this paper, the authors can find the different methods and procedures for labeling tourism values. - Valjarević, A., Vukoičić, D., & Valjarević, D. (2017). Assessment of tourism potential and natural attractiveness of the Lukovska health resort. *Perspectives on tourism management*, 22, 7-16.
4. Good luck to the authors.
