

Review of: "Investigation of Mechanical Properties of Sisal Fiber and Sugar Palm Fiber Reinforced Hybrid Composites"

Ezekiel O. Ariyo¹

¹ University of Ilorin

Potential competing interests: No potential competing interests to declare.

Abstract: The implication of the findings is not reflected in the conclusion

Introduction: Scientific statements should be backed with references

Unit of temperature should be written as a symbol

Materials and Methods: Over the past few years, the focus of researchers has been..... (mention a few of them, in current form). Also, mention how sisal fibre was extracted from the leaves of the sisal plant.

What informed the authors on the percentages of the three hybrid composites used?

There should be practical inference/application drawn from the conclusion

References: The year of publication should come immediately after the names of the authors.
