Potential competing interests: No potential competing interests to declare.

The manuscript is interesting and discusses the current concepts in network neuroscience.

Comments:

- * Caption of Fig.1: "In addition, there is Criteria F": there is no criterion F and no details are given. This should be corrected.
- * page 3: "...summarized seven diffusion tensor imaging (DTI) which..." → "(DTI) studies which"
- * page 4: "Moreover, this effect appeared to be ...": rephrase
- * page 4: "...PTSD where there not a..." → "PTSD where there was not a"
- * page 5: "between brain volumes differential" → "between brain volumes' differential"
- * page 5: "...and how these may related..." → "and how these may be related"
- * page 5: "that activation patterns predict PTSD"
