Clopidogrel Bisulfate

National Cancer Institute

Source

National Cancer Institute. Clopidogrel Bisulfate. NCI Thesaurus. Code C2673.

A thienopyridine with antiplatelet activity. Clopidogrel bisulfate irreversibly alters the platelet receptor for adenosine diphosphate (ADP), thereby blocking the binding of ADP to its receptor, inhibiting ADP-mediated activation of the glycoprotein complex GPIIb/IIIa, and inhibiting fibrinogen binding to platelets and platelet adhesion and aggregation. (NCI04)
