Derived Unit of International System of Units

National Cancer Institute

Source

National Cancer Institute. *Derived Unit of International System of Units*. NCI Thesaurus. Code C42534.

Derived units of the International System of Units (Système International d'Unités, SI) are those formed by combining base SI units according to the algebraic relations linking the corresponding quantities. The names and symbols of some of the units thus formed can be replaced by special names and symbols which can themselves be used to form expressions and symbols of other derived units.
