Potential competing interests: No potential competing interests to declare.

This work is interesting when authors could verify the liver function of a syrup made from Vitex Doniana fruit.

Some points need major revision to be carefully addressed by authors.

The manuscript language (grammar) must improve and be checked by an English native speaker.

1-Abstract section:

Background section: Authors should highlight the research gap in the beginning of the abstract. The purpose should be mentioned at the end of the background.

Methodology section: The first sentence should be removed and replaced by a sentence introducing the method followed by the authors.

Result section should be improved. The results of histopathology should be highlighted in the abstract.

Conclusion should be revised.

2-Introduction section:

The manuscript language (grammar) must improve and be checked by an English native speaker.

3-Material and Method section

The titles such as "Determination of Haematology" should be improved.

4-Result section

The result section should be improved

What is the research gap??

Conclusion is absent.

Decision :

Accepted with major revision.
