Alpha-thalassemia-myelodysplastic syndrome

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Alpha-thalassemia-myelodysplastic syndrome. ORPHA:231401*

Alpha-thalassemia-myelodysplastic syndrome (AT MDS) is an acquired form of alpha-thalassemia (see this term) characterized by a myelodysplastic syndrome (MDS) or more rarely a myeloproliferative disease (MPD) associated with hemoglobin H disease (HbH; see these terms).
