Leminorella richardii

National Cancer Institute

Source

National Cancer Institute. *Leminorella richardii*. NCI Thesaurus. Code C86494.

A species of facultatively anaerobic, Gram negative, rod shaped bacteria in the phylum Proteobacteria. This species is hydrogen sulfide positive, citrate and oxidase negative and produces acid from L arabinose and D xylose but not dulcitol. L. richardii is an emerging nosocomial pathogen, especially in immunocompromised patients.
