

# Review of: "Phytochemical Contents, GC-MS Analysis and Hepatoprotective Effect of the Methanol Leaf Extract of *Camelliasinensis* (L.) Kuntze on Paracetamol-Induced Liver Injury in Wistar Rats"

Richard Sedeavor

Potential competing interests: No potential competing interests to declare.

1. The title of this paper should be changed to "Phytochemical screening, GC-MS Analysis, and Hepatoprotective Effect of the Methanolic Leaf Extract of ....."
2. The background and objectives should specify the type of leaf extract used in the study, that is, methanolic leaf extract.
3. "Methanol Leaf extract" should be changed to "methanolic" leaf extract. This applies to the whole article.
4. The introduction is too lengthy.
5. The introduction should justify why the study was on "acute" paracetamol-induced liver injury.
6. A reference should be added to the last sentence of paragraph 4 of the introduction .
7. A reference should be added to section 2.3 of the materials and methods. That is, the method used should be referenced.
8. The dose of the standard (silymarin) should be specified.
9. Photomicrographs should be redefined/described.
10. The comment under conflict of interest should be changed to "Not Applicable."
11. Since this study also employed animal models, there should be a section for Ethical Approval.
