Dear authors,

First, kudos for investigating this topic, which is of great importance for many African countries. To improve the quality of the study, I suggest that the authors review the DISCUSSION PART of the paper.

All the findings of the study (the barriers that hinder women in accessing financial services for agribusiness, i.e., lack of access to collateral, limited financial literacy, cultural barriers, etc.) should be discussed with the findings of previous studies. Authors of the current paper might use the authors of the Empirical Evidence drawn in the Table of the Results part. Accordingly, each type of barrier in the paper will be discussed with those of referenced empirical evidence.

Thanks
