This paper explains "Review of: **Regulatory Compliance of PCDD/F Emissions by a Municipal Solid Waste Incinerator: A Case Study in Sant Adrià de Besòs, Catalonia, Spain**". The reviewer recommends further major revision of the paper. Below are some comments to help improve the paper.

- The abstract should be enhanced by accurately summarizing the research findings.
- The novelty and objective can be re-written.
- The conclusion should be succinctly written, encompassing the study's history, aims, methods, and major findings, all within a single paragraph. Please pay careful attention to it.
- To establish the originality and purpose of your work, you might revise the novelty and objective by consulting the papers mentioned below and citing them in relevant sections.
- Regarding this, you can refer to journal guidelines and provide the proper citation for only the last five years.
- Please state the comparison of your findings with other published papers or works, so that your manuscript could contribute to new knowledge.
- Enhance the quality of the results and discussion sections.
- Evidence is recommended following the conclusion section.
