Technical and Financial Viability of a 1 MW CSP Power Plant with Organic Rankine Module: Case Study for a Northeastern Brazilian City by Ponte and Rocha

There are lot of spelling mistakes through out the manuscript that needs proper correction.

Some sentences were repeated twice and thrice revealing the same meaning, hence they should be removed.

A typical layout of the plant is expected in the article to understand the plant operation.

In the results section, the figures need improvement in terms of font size, legends, etc. as they are not readable.
