

Review of: "Assessing the Role of Consumer Cooperatives in Improving Livelihood of the Members of Hawassa Zuria Woreda, Sidama Regional State, Ethiopia"

Dr.T Amose¹

¹ The American College, Madurai

Potential competing interests: No potential competing interests to declare.

1. Author has taken a congratulatory work. It is most important to know as an external factor that improves the livelihood of people.
2. What is 'Hawassa Zuria Woreda,' whether it is the name of a place or any NGOs? Because, in the entire study, the words are brought in sense of pointing to the name of a place.
If it is the name of a place, the given topic should be rewritten.
If it is the name of any organisation, it is ok.
3. In the first objective, the starting words 'To evaluate' should be rewritten as 'To report.' Because, it can't be evaluated that 'consumer products are being marketed by consumer cooperatives'.
4. The research gap for this study is not drawn from the given review of literatures.
5. Part of the objectives should be placed after the review of literatures and research gaps.
6. The given statistical information is only about choosing sample size, but not for further data processing.
7. The 'N' statistical information from tables 1 and 2 seems like it is different from the selected total number of sample size.
8. The sampling technique or grouping of respondents is not clear, which is important for data analysis.
9. No statistical information is given for understanding objectives 'C and D' as they have the role of assessing in the part of objectives.
10. The present study is not perfectly reflecting a statistical report for all the given objectives.
