The care of diving medicine is indeed an aspect that receives less attention. This is also an important value of this manuscript. However, I still have the following review comments for the authors.

1. Please do not use abbreviations in titles unless the abbreviation is widely accepted.
2. DMTs should refer to "Diver Medical Technicians" rather than "Diver Emergency Medical Technicians". Please unify the usage of abbreviations.
3. In "The Maui County EMS Paradigm" subsection, this subsection should be merged into the previous subsection. This is a more appropriate approach.

Please pay attention to the citation of literature. Many descriptions in the manuscript require supplementary literature citations. Please correct them.
