# BardPort Titanium Implanted Port with Peritoneal Catheter

National Cancer Institute

## Source

National Cancer Institute. *BardPort Titanium Implanted Port with Peritoneal Catheter*.  
NCI Thesaurus. Code C162785.

An implantable access device designed to provide repeated access to the peritoneal cavity for the delivery of medications and other fluids. Port access is performed by percutaneous needle insertion using a non-coring needle. The system consists of two primary components: an injection port with a self-sealing silicone septum and a radiopaque silicone rubber catheter.
