# Fallopian Tube Serous Cystadenofibroma

National Cancer Institute

## Source

National Cancer Institute. *Fallopian Tube Serous Cystadenofibroma*. NCI Thesaurus. Code C40114.

A rare, benign, asymptomatic neoplasm that arises from the fallopian tube. The tumors are round and solitary and contain connective tissue and cystic structures lined by serous-type epithelium. The majority of cases are incidental findings during operation for an unrelated gynecologic disorder.
