Potential competing interests: No potential competing interests to declare.

1. Need to include discussion of some recent work:

[1]. Camera-aware graph multi-domain adaptive learning for unsupervised person re-identification[J]. Pattern Recognition, 2024: 111217.

[2]. Camera domain adaptation based on cross-patch transformers for person re-identification[J]. Pattern Recognition Letters, 2022, 159: 84-90.

[3]. Transfer easy to hard: Adversarial contrastive feature learning for unsupervised person re-identification[J]. Pattern Recognition, 2024, 145: 109973.

2. A discussion of the limitations of the proposed approach and potential future research directions can be included.
