Potential competing interests: No potential competing interests to declare.

Excellent written paper which addresses an important research area.

- Authors should be consistent in their citations. Some citations are in all capital while others are in normal sentence case.
- Authors are encouraged to incorporate more recent citations. Especially those within the last 3 years.
- If possible, the use of personal pronouns (such as we) should be minimised.
- Implications of study should be clearly spelt out at the end of the work.
- Limitations of study should also be touched on.
