Potential competing interests: No potential competing interests to declare.

## Abstract Section

None

## Introduction Section

1) Remove the reference "(Tsang et al., 2023)" from the last statement, which speaks to the research aim statement.

## Section 2

1) A methodology should be presented before section 2 to briefly highlight how the results of the study were obtained.

2) Section 2.6, first paragraph – last two statements are repetition. Hence, remove one statement.

## Conclusion and Future Prospects Section

None

Decision: Minor revision is required before the manuscript can be accepted for publication.
