

Review of: "Spatio-Temporal Analysis of Precipitation Patterns in Xinjiang Using TRMM Data and Spatial Interpolation Methods: A Comparative Study"

Pedro M.P. Guerreiro

Potential competing interests: No potential competing interests to declare.

Because the text is not in English in many figures, it is difficult to analyze results and conclusions. The interpretation of the article's content lacks of the connection between the text and the figures due to the language mismatch.

The study lacks of precipitation climatology study (even from former climatology studies).

The connection between the study results and water resource management is missing. It should be provided to prove the study conclusions.
