Potential competing interests: No potential competing interests to declare.

1. The study is very informative, and all the predicted variables showed a significant relationship with sustainability.
2. However, the study does not employ any theory supporting the relationships between independent and dependent variables.
3. The study also does not support the relationships with the literature.
4. The study should highlight the study's limitations and recommendations for future research.
5. The study should highlight the academic and practical contributions from the study.
