

Review of: "Effective use of Waste Materials: A Case Study of Utilization of Fly Ash in Flexible Pavement Structures"

Zhipeng Li

Potential competing interests: No potential competing interests to declare.

This work doesn't seem to resemble a case study but rather more like a review. The authors need to consider reorganizing this manuscript. For a case study, there should be a specific case presented, and that case should convey a certain message to the readers. For a review analysis, it shouldn't just list what previous researchers have done but should rather summarize their findings and highlight the existing unresolved issues.
