

# Review of: "Application of Data Mining Combined with K-means Clustering Algorithm in Enterprises' Risk Audit"

Chistos Drosos<sup>1</sup>

<sup>1</sup> University of West Attica

**Potential competing interests:** No potential competing interests to declare.

1. The topic is largely relevant in the field and addresses the specific gap.
2. The references are appropriate, and the conclusions are adequately supported by the experimental data obtained.
3. Does not need any changes and can be published as it is
