Dear Authors,

thank you for your work, it arises consciousness on a very difficult topic.

Let me help you with very few suggestions:

The abstract could be more structured if you could explain why the topic is important; which gap is in the research; indicate methods and concluding with your point on the topic.

In the introduction could you add some best practice (if existing) or indications of case studies? Maybe it could be good to sum up the main findings in literature review at the end of the paragraph.

The Methodology is very well done as the Result and discussion part.

Maybe conclusion and recommendations could be just one final paragraph.

thank you for your efforts!
