Potential competing interests: No potential competing interests to declare.

-On Title, Change the word "Examining" into "Examine" because, this is a research not an intervention.

- On abstract how you analyze data using tables, graphs and pie chart.
- In abstract please narrate your result before conclusion.
- In Introduction you missed the letter "C" from the word "common".
- Your reference is too old.
- What is your sampling design?
- How you measure the water use and sanitation practices?
- In general it is good if you add some models for analysis of your result.
