Potential competing interests: No potential competing interests to declare.

Overall, this paper is well-written and addresses some of the tragedies in the literature. However, I have some modifications. First, you need to add more evidence about the main point of this study. Second, you need to add more new references to support your study. Third, the paper states it is a qualitative study, yet your results present quantitative data. Please clarify why. Please check for punctuation (especially full stops at the end of paragraphs).
