

# Review of: "The Global Impact on Health of Dental Infections and Antibiotic Resistance:A mini Reveiw"

ammar Riyad Mohi

Potential competing interests: No potential competing interests to declare.

1. Idea was clear but needs a little bit more explanation.
2. Author/s deepened on figures (pictures, charts, images) as they are not a valuable means of presenting clinical facts evidence in follow-up or statistically significant values.
3. The processing of the writing flow was valuable and summarized values, but it is still a short-format review with gaps, especially in a wide range of results.
