Rapid-onset childhood obesity-hypothalamic dysfunction-hypoventilation-autonomic dysregulation syndrome

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. Rapid-onset childhood obesity-hypothalamic dysfunction-hypoventilation-autonomic dysregulation syndrome. ORPHA:293987

A rare syndromic endocrine disease characterized by childhood-onset hyperphagia and obesity, alveolar hypoventilation, dysautonomia, hypothalamic dysfunction and neurobehavioral disorders. Central hypothyroidism, endocrine anomalies, electrolyte imbalances and respiratory failure may also be associated.
