SB-AS02B Adjuvant

National Cancer Institute

Source

National Cancer Institute. *SB-AS02B Adjuvant*. NCI Thesaurus. Code C2810.

A proprietary oil-in-water emulsion specifically designed for combining protein preparations used in vaccines. SB-AS02B adjuvant contains monophosphoryl lipid A and QS21, a saponin extracted from the South American tree *Quillaja Saponaria Molina*. This agent may be used for formulating cancer-specific vaccine preparations such as those containing MAGE-3 melanoma protein. (NCI04)
