Potential competing interests: No potential competing interests to declare.

The length of the review paper is inadequate and needs to be extended. Try to include more information and expand on the topics discussed to ensure comprehensive coverage of the efficacy of copper nanoparticles in treating viral skin infections.

The number of references provided is insufficient for a review paper. Please consider including more relevant and recent references to support the points made and strengthen the overall credibility of the review, as well as, most of the references cited in this paper are about silver nanoparticles!!!!

It would be helpful to include more in-depth explanations and discussions in various sections of the paper. This will enhance the understanding of the readers and add value to the content.

The inclusion of figures and tables would greatly improve the comprehension and readability of the review paper. Consider adding relevant figures, diagrams, or tables to illustrate and present the information effectively.

Overall, these suggestions should be considered for further improvement of the review paper.
