Stage IIIC2

National Cancer Institute

Source

National Cancer Institute. Stage IIIC2. NCI Thesaurus. Code C95180.

A stage term that applies to uterine corpus cancer and indicates that the tumor is confined to the corpus uteri, or it invades stromal connective tissue of the cervix but does not extend beyond the uterus, or it involves serosa and/or adnexa, vagina, or parametrial tissue. There is regional lymph node metastasis to para-aortic lymph nodes, with or without positive pelvic lymph nodes.
