Dear authors I have the following comments and questions as follows:

1. The title is too long and not attractive. Make it short and attractive by avoiding those names of places.
2. The abstract is not well written. Please avoid mentioning the names of individuals and departments in abstract section. Instead focus on the problem, method, result and your conclusions.
3. The introduction section is missed. The authors start from writing about social impacts. This section is important but what is the research problem and how it is different from previous research, the novelty of your research must be addressed here. Please re-write this portion clearly.
4. Where is the content number, headings, and subheadings?
