The article needs to be modified and revised by improving the abstract and keywords section. The abstract section should be improved by adding a clear main objective. Some statements need to be removed, such as row 7 (Further...) and row 9 (However....). The keyword section should be improved by ignoring the keyword "utilization of waste material" and changing it to "flexible pavement." The sub-title of "fly ash as mineral filler" should be checked to ensure the paragraph is focused on the fly ash only and not on other ash/waste material, or the sub-title should be changed. Every main title should be added to the last paragraph, which summarises the findings. Every part of the main title should be improved by adding the complete table for introducing findings from previous studies or constructing the flow chart/chart that discusses previous study findings.
