Potential competing interests: No potential competing interests to declare.

- In the methods section lower limit of weeks' gestation should be mentioned (28?)
- In the methods it was mentioned that midwives performed cord traction which is the same as cord milking? If this was done for all newborns it probably affected the outcomes. How was it done?
- In the discussion 2nd para: references would be good to add
- In the last para of the discussion findings from this study were lacking
