Nicotinate-Nucleotide Pyrophosphorylase [Carboxylating]

National Cancer Institute

Source

National Cancer Institute. *Nicotinate-Nucleotide Pyrophosphorylase [Carboxylating]*. NCI Thesaurus. Code C112839.

Nicotinate-nucleotide pyrophosphorylase [carboxylating] (297 aa, ~31 kDa) is encoded by the human QPRT gene. This protein is involved in the synthesis of nicotinamide adenine dinucleotide.
