Potential competing interests: No potential competing interests to declare.

First of all, I would like to thank you for the possibility of reviewing this interesting paper that I have read with great interest.

The paper may have a clear interest associated to researchers from different scientific disciplines and, therefore, could have a notable repercussion in specialized scientific literature.

The similarity must be reduced from 67%(Turnitin.com).

Why is this study necessary? should make clear arguments to explain what the originality and value of the proposed model is. This should be stated in the final paragraphs of introduction and conclusion sections.

Literature overview

I would like to suggest the following references:

Fülöp, M. T., Breaz, T. O., Topor, D. I., Ionescu, C. A., & Dragolea, L. Challenges and Perceptions on e-learning for educational sustainability in a "New Normality Era". *Frontiers in Psychology*, 14, 82.

Fülöp, M. T., Udvaros, J., Gubán, Á., & Sándor, Á. (2022). Development of Computational Thinking Using Microcontrollers Integrated into OOP (Object-Oriented Programming). *Sustainability*, 14(12), 7218.

Akram, U et al. (2021). Impact of digitalization on customers' well-being in the pandemic period: Challenges and opportunities for the retail industry. *International Journal of Environmental Research and Public Health*, 18(14), 7533.

Pleas add a research methodology part

Conclusions: pleas add theoretical, managerial, and practical implications, limitation and further research. Some parts are included but must be extended.

Overall, I believe that the ideas are well expressed, and the storyline is easily followed by the reader. However, in the

course of reading the manuscript, I could identify some minor mistakes that should be dealt with more carefully by the authors.

In short, in my opinion, this is a potentially publishable paper that could make a significant contribution to the specialized literature. However, the authors should make an additional effort to solve the problems previously mentioned.

However, I hope that all these comments will serve the author to improve the quality of the paper. Finally, I hope that the comments will be understood positively by the authors of this interesting paper.

Good luck!
