Hermansky-Pudlak Syndrome 6

National Cancer Institute

Source

National Cancer Institute. *Hermansky-Pudlak Syndrome 6*. NCI Thesaurus. Code C150369.

An autosomal recessive sub-type of Hermansky-Pudlak syndrome caused by mutation(s) in the HPS6 gene, encoding Hermansky-Pudlak syndrome 6 protein. Individuals with this type of syndrome, as well as with types 3 or 5, have the mildest symptoms.
