

Review of: "Unravelling The Contributions Of The Nigerian Livestock And Other More Prominent Sectors In Mitigation Of Global Green House Gas (GHG)"

Gregory Sikakwe

Potential competing interests: The author(s) declared that no potential competing interests exist.

Topic: Unraveling the contribution of the Nigerian Livestock and other more prominent sectors in mitigation of global Green House gas

The topic is well thought out but the structure and presentation of ideas makes reviewing difficult.

The following comments are meant to improve the work for further review.

Abstract

Rephrase the first sentence in the abstract. Write abbreviations in full at first mention.

rewrite the entire abstract in one paragraph. Abstract should consist of the following: Motivation for carrying out the research, method of study, major findings, conclusion and relevance of the study to researchers in a similar area in other parts of the world.

Introduction

Write on the background of the study. Review similar literature by other researchers in other parts of the world and in your area of study. Cite literature appropriately on works done by other researchers.

State the problem statement, theory, significance and objectives of your study. Include the novelty of your study (what improvement have you done in your study compared to similar works done elsewhere or in your study area? Itemize your objectives of study.

The general structure of the study should be as follows: Abstract, Introduction, Method of study, Results and discussion, conclusion, references and appendix (if applicable).

Author (s) should reorganize the work in the above structure and resubmit for review.
