Reviewer Comments on

New computational methods using seventh derivative type for the solution of first order initial value problems

I have read the paper thoroughly. My comments are as follows:

- The authors should add some proper references from the literature such as:

  1- doi.org/10.37256/cm.5120244054

  2- doi.org/10.37256/cm.4420233302

  3- doi.org/10.1007/s40819-024-01696-7

- Add a comma or period at the end of all equations.

- The paper needed some grammatical revision before being accepted.

- In the Test Problems, authors should write the conclusions of what they are showing in the given tables and figures.

Recommendation: Accept After Minor Revision
